

# Comments and Errors

## 1. Title error in README.md file

Missing enter in the beginning of README file, and it's cause wrong Title

cypress-e2e-allure# Cypress-e2e-Allure Automation-Framework with allure reports

```
1 # cypress-e2e-allure# Cypress-e2e-Allure Automation-Framework with allure reports
2
```

## 2. Code error in login.test.ts

In “login with wrong email format credentials read data from fixture” test an error, that cause error in validation(should be:” Invalid email address”

```
12 - assert expected <li> to have text Invalid
    email addressssss. , but the text was Invalid
    email address.
```

```
it('login with wrong email format credentials read data from fi
  loginPage.login(this.data.invalid_credentials.wrong_email_f
  loginPage.validateLoginError('Invalid email addressssss.')
```

## 3. Workflow error because of №2 error

## Workflow doesn't work because of issue №2

**Run\_test (14.17.0)**  
failed on 16 Jul in 2m 34s

Search logs

- > Set up job 9s
- > Run actions/checkout@v2 1s
- > Use Node.js 14.17.0 7s
- > Run npm i npm@latest 19s
- > Run npm i 2s
- > **run test 1m 45s**

1) Login Functionality

```
login with wrong email format credentials read data from fixture:
```

Timed out retrying after 5000ms

+ expected - actual

- 'Invalid email address.'

+ 'Invalid email addresssssss.'

## 4.Allure reports don't work

When running report script, creates an empty allure-reports

## Comments:

- 1. In this project really good selectors
- 2. Tests look good and clearly
- 3. Assertions should be in test, not in pages

```
public validateLoginError(errorMessage: string) {  
  this.alertBox.should('be.visible')  
  this.alertMessage.should('have.text', errorMessage)  
}
```

- 4. in myAccount.test.ts you can delete import code cause it's not used by test

```
import { LoginPage } from "../pages/loginPage";
```
